An International Meeting on *Cronobacter* (*Enterobacter sakazakii*)

January 22nd & 23rd, 2009

**University College Dublin, Belfield, Dublin 4
IRELAND**

Irish collaborators acknowledge the financial support provided through the Food Institutional Research Measure (FIRM) grant no.: 05/R&D/D/363

Preliminary Scientific Programme:

Thursday 22nd - Friday 23rd January 2009
Keynote lecture - Prof JJ Farmer III, Director US-PHS (retired)
<u>Session-1</u> : Taxonomy & identification
<u>Session-2</u> : Isolation methods
Workshop A - Isolation and identification
<u>Session-3</u> : Public Health
<u>Session-4</u> : Analysing the risk
Workshop B - Risk analysis
<u>Session-5</u> : Occurrence & surveillance 1
<u>Session-6</u> : Occurrence & surveillance 2
Workshop C - Surveillance and tracing contamination
Closing : roundtable discussion and way forward

Workshop sessions will comprise up to four 10 minute oral presentations selected from submitted abstracts followed by questions and open discussion.

Attendance at this meeting is recommended for microbiologists working in the areas of public health, food safety and food manufacturing; clinicians involved with infant health; as well as professionals involved with food and health regulation.

The workshop sessions are intended to disseminate information to support microbiologists, managers and technicians in regards to the practical problems faced with the detection and control of *Cronobacter (Enterobacter sakazakii)*.

Abstracts for poster and oral presentations are welcomed in all areas of *E. sakazakii* research. Posters will be displayed throughout the conference. Oral presentations on original research will be incorporated into the workshop programme.
